

RE: 16 CFR Part 423 -- Care Labeling Rule -- Comment,"

I attended the Owner/Operators meeting in Peoria, IL on Saturday, July 25, 1998. There I heard that suggestions about care labels was in be in by tomorrow.

I am a consumer concerned with the thread used to attach the labels. In most instances I remove the care labels as the thread is irritating to my skin.

A solution would be to use the same thread as the garment is sewn with to attach the care label.

Of course, the label should not be of such stiff material as to be irritating, nor sewn in such a manner to tend to stick out of the garment.

I do appreciate and follow information on the labels. Having them remain in the garment would make them even more useful.

Thank you for considering this issue. If I have not reached the appropriate site, please forward my thoughts to where they can be heard.
